

PRATHIBHA SIVAKUMAR

Computer Science Engineer

PROFILE SUMMARY

Computer Science Engineering graduate with 10 months of industry experience across backend development, UAT support and ML-based workflows. Proficient in SQL, Excel, Python and Power BI with hands-on exposure to Databricks, cloud environments and collaborative delivery teams. Seeking full-time opportunities in Data, Analytics and Software Engineering roles.

EXPERIENCE

Avasoft — **AI Trainee Engineer** → **ML Analyst** Aug 2025 - Jun 2026
Contributed across 3 client projects in backend development, UAT support and ML-based forecasting.

CityTwig · Backend Development · REST API · Python

- Developed a chat history search API for the Hulii chatbot with pagination, search, filtering and sorting capabilities across conversations, messages and uploaded files.

GSG · Databricks · UAT Support · Agent Systems

- Resolved UAT issues and improved code quality through code standardisation, including docstrings, return types and removal of hardcoded values; created documentation and implemented fixes for prompt store issues at the database level.
- Supported UAT testing and workflow validation across agent tools including triage, RBAC, feedback and follow-up flows, along with system and user prompt handling.

J Goldman · Databricks · ML Forecasting · Ensemble Models · Data Pipelines

- Supported an ML-based YoY revenue forecasting solution for a hedge fund, delivering QTD predictions as forecasted values and full-quarter predictions as actuals for current and guidance quarters.
- Maintained four Databricks pipelines (Daily and Quarterly) for ML predictions, using formula-based delta models with an MC-specific variant for Maiden Century.
- Assisted in managing regression, adjusted and FD models; the top 10 ranked models via the Borda algorithm were combined into the production ensemble for final predictions.

PROJECTS

Enterprise Knowledge Assistant — FastAPI · PostgreSQL · RAG · Embeddings

- Built an AI-powered assistant that lets users query documents in natural language via a RAG pipeline with PDF parsing, chunking and vector embeddings; developed secure REST APIs with FastAPI, a Dockerized PostgreSQL + pgvector database and JWT authentication.

Real-Time Shipping Cost Prediction — Python · ML · SQL · FastAPI · Power BI

- Built a real-time freight cost prediction system using a FastAPI regression model that estimates shipping cost at cart stage before order placement, with interactive Power BI dashboards.

HR Analytics Dashboard — Power BI · Power Query · DAX

- Designed an HR Analytics dashboard using Power Query for data preparation and DAX for KPIs and interactive visualizations analyzing employee attrition across departments, job roles and demographics.

Portfolio

TECHNICAL SKILLS

PROGRAMMING

Python

DATABASES

SQL

DATA & ANALYTICS

Excel, Power BI

PLATFORMS

Databricks, FastAPI,
PostgreSQL

TOOLS

Git, GitHub, VS Code

CONCEPTS

Machine Learning, RAG,
Embeddings, Backend
Workflows, API Usage

EDUCATION

SRM Easwari Engineering College, Chennai

B.E. Computer Science Engineering 2022–2026
First Class with Distinction
Percentage: 86.6%

DAV School, Adambakkam

Senior Secondary (2020–22):
81.6%

Secondary (2018–20): 83.6%

LANGUAGES

Fluent: Tamil, English

Conversational: Hindi, Telugu

LEADERSHIP

– Hospitality Head & Decoration Lead — Kroatos CSE Symposium, Easwari Engineering College

– Youth Red Cross Member - Mission Crusader initiatives
